

## Remote data centre monitoring solutions

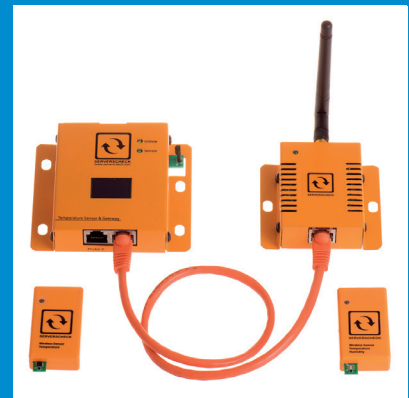

Flexibility and security at your fingertips – wherever you are

Monitoring is an essential task when it comes to environmental conditions, ensuring the highest security as well as performance within your data centre. With a remote system from Critical Power it gives you complete local or remote control over software and hardware to reduce network outages and quickly detect, diagnose and resolve performance issues with speed and efficiently.

### THE CRITICAL WATCH LITE – PORTABLE PROTECTION FOR PERFECT PEACE OF MIND

Utilising the latest microprocessor technology coupled with state of the art GSM engineering the Critical Watch Lite provides the most economical solution for remote telemetry with the added advantage of being self powered to ease installation and maintenance. Features include:

- Integral Programmable Processor and local display.
- Multiple dry contact inputs from door sensor to leak sensor.
- Thermal camera and wireless available.
- Alarms sent directly to your mobile phone or email.
- Choice of power options.
- Graphical display to help with configuration.
- Tri band GSM for global operation available.
- Weatherproof enclosure options.
- Digital inputs: volt free contact or voltage as standard impedance.

**A FLEXIBLE AND  
SECURE SYSTEM  
THAT CAN BE RAPIDLY  
DEPLOYED TO MEET  
YOUR BUSINESS  
REQUIREMENTS.**

**OUR SYSTEM BRINGS YOU THE ABILITY TO MONITOR  
YOUR ASSETS FROM ANYWHERE IN THE WORLD.**

## REMOTE MONITORING, WHEN & WHERE YOU NEED IT

Delivered, installed and maintained with minimum disruption, you can rest assured that a remote monitoring system from Critical Power will meet your security and early detection needs both now and in the future.

The options are only limited by what you want to monitor:

- Choice of power options.
- Range of platforms from rackmount, Wallmount to Polemount.
- Local LCD display.
- Range of sensor options from door contact, leak, fuel, air movement, sound, thermal camera and more.
- Range of mounting options.
- Temperature and humidity monitoring in built.
- Dry contacts in built.
- Fuel and leak detection sensor cable extensions available.
- Equipped with all electrical services, including lighting, power, intruder / fire alarms and fire suppression systems.
